

Product Information

RH237

Catalog Number: R4025

Product Size: 5 mg

Application: Membrane potential staining

Parameters

Appearance: Black solid soluble in DMSO

Ex/Em (MeOH): 528/782 nm

CAS No.: 83668-91-1

Molecular Formula: C₂₉H₄₀N₂O₃S

Molecular Weight: 496.71

Molecular Structure:

Storage

Store at -20°C and protect from light. When stored as directed, product is stable for at least 12 months.

Description

RH237 is a fast-responding potentiometric probe that is primarily used for functional imaging of neurons. It is also used to monitor cell membrane potential, synaptic activity and neuron ion channel activity. In cell membranes, the spectra of styryl dyes are typically blue-shifted by as much as 20 nm for absorption or excitation and 80 nm for emission.

Notes

1. There are quenching problems with fluorescent dyes. Please avoid light to slow down the fluorescence quenching.
2. For your safety and health, please wear lab coats and disposable gloves.
